SUMMARY

Computer Science undergraduate (CGPA 9.28/10) with practical experience in full-stack web development and AI/LLM integration. Built and deployed multiple full-stack applications including an AI-powered resume builder, an LLM chatbot, and a full-featured e-commerce platform. Solved 146 problems on LeetCode and 693 problems on GeeksforGeeks across topics including Arrays, Linked Lists, Trees, Dynamic Programming, and Greedy Algorithms. Earned Microsoft Azure AI Fundamentals and MongoDB certifications. Seeking a software engineering internship to contribute to real-world engineering challenges.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, C

Frontend: React, HTML5, CSS3, Tailwind CSS, JavaScript (ES6+)

Backend & APIs: Node.js, Express.js, REST APIs

Databases: MongoDB, MySQL, Oracle SQL

AI / ML: LLM API Integration, Prompt Engineering, NumPy, Pandas, Scikit-learn

CS Core: Data Structures & Algorithms (Arrays, Linked Lists, Trees, BST, Heaps, Graphs), Sorting & Searching, Dynamic Programming, Greedy Algorithms, BFS/DFS, OOP, Complexity Analysis

Tools: Git, GitHub, VS Code, Postman

EXPERIENCE

Web Development Intern — HunarIntern

Jun 2025 – Aug 2025

Built and deployed 5 front-end projects (portfolio website, online course platform, Netflix clone, BMI calculator, CurioMind) with fully responsive layouts across mobile and desktop.

- Implemented all UI from scratch using HTML, CSS, and JavaScript — no UI libraries — ensuring cross-device compatibility.
- Managed version control and deployment workflows using Git and GitHub throughout the internship.

Training Programs

- AICTE (Eduskills) — Java Full Stack Developer (Sep 2024) | Android Developer with Kotlin (Dec 2024)

PROJECTS

Acne Severity Detection — Deep Learning (VGG-Based) [GitHub ↗](#) [Live ↗](#)

Stack: Python, Flask, REST API, Deep Learning, VGG Architecture

- Built the backend REST API service for a multi-level acne severity detection system using a VGG-based deep learning model, achieving 71% classification accuracy.
- Designed and implemented Flask REST API endpoints to accept image inputs, run model inference, and return severity level predictions to the frontend.
- Deployed the backend service to Render, enabling live API consumption from the web application.

AI Resume & Cover Letter Builder [GitHub ↗](#) [Live ↗](#)

Stack: React, JavaScript, LLM API, HTML, CSS

- Built a React application that generates tailored resumes and cover letters by calling an LLM API directly from the frontend based on user-provided details and job descriptions.
- Designed structured prompt templates to consistently extract well-formatted document content from the LLM across different job roles and experience levels.
- Implemented a live preview-and-edit interface allowing users to refine, preview, and download the generated documents.

LLM Chatbot Application [GitHub ↗](#) [Live ↗](#)

Stack: React, JavaScript, LLM API

- Built a conversational AI chatbot with persistent multi-turn memory, maintaining full conversation context across exchanges without losing prior messages.
- Integrated LLM API with carefully structured system and user prompts to produce accurate, context-aware responses in real time.

ShopSphere — E-Commerce Platform [GitHub ↗](#) [Live ↗](#)

Stack: React, JavaScript, CSS

- Developed a full-featured e-commerce platform with product browsing, search and filter, product detail pages, cart (add/remove/quantity), wishlist, checkout, user auth UI, and discount/deals system.
- Built 5–8 modular React components and managed all UI state using React hooks (useState, useContext) with no external state library.

- Deployed to Vercel with consistent performance across devices using responsive CSS layouts.

CurioMind — Online Course Registration Platform [GitHub ↗](#) [Live ↗](#)

Stack: *HTML, CSS, JavaScript*

- Developed a web-based platform enabling users to browse courses and register online.
- Implemented structured layouts and client-side interactivity with clean, user-friendly UI design.
- Built fully responsive layouts ensuring consistent experience across mobile and desktop devices.

Destination Stays — Hotel Booking System [GitHub ↗](#)

Stack: *Python, Tkinter, CSV*

- Led the team and designed a desktop hotel booking application with dynamic room selection, availability tracking, and user profile management.
- Implemented data persistence using CSV-based file I/O and built the complete GUI using Python Tkinter.

EDUCATION

B.Tech — Computer Science Engineering

2023 – 2027 (Pursuing)

Sri Vasavi Engineering College, Peddatadepalli **CGPA: 9.28 / 10.0**

Intermediate (MPC)

2021 – 2023

Sri Chaitanya Junior College, Tadepalligudem **95%**

CERTIFICATIONS

- Salesforce Certified Agentforce Specialist — Salesforce
- Azure AI Fundamentals (AI-900) — Microsoft
- MongoDB Associate Developer — MongoDB University
- DSA Master with Java — ExcelR
- Introduction to IoT | Privacy & Security in Online Social Media — NPTEL

DSA PROBLEM SOLVING

LeetCode: 146 problems solved | **GeeksforGeeks:** 693 problems solved

Topics covered: Arrays, Strings, Linked Lists, Stacks, Queues, Binary Trees, BST, Heaps, Matrices, Binary Search, Sorting (Merge/Quick), Two Pointers, Sliding Window, Prefix Sums, Dynamic Programming (DP), Greedy Algorithms, Backtracking, Tree Traversals (Pre/In/Post/Level/Boundary), Graph BFS/DFS, Stack Applications (Infix/Postfix/NGE), Divide & Conquer
